## Skills

- TypeScript
- Node.js
- GraphQL
- React
- Redux
- HTML5/SCSS
- React Native
- Xcode
- Version control (Git)

## Work Experience

Mar. 2021 –  
Present

**Vascar Solutions | Front-end developer (React, React Native, GraphQL, Redux, TypeScript)** - Focusing on building and maintaining user interfaces using advanced technologies. I developed dynamic web applications with React and mobile applications with React Native. I utilized GraphQL to optimize data queries and Redux for state management in applications. Additionally, I leveraged TypeScript to enhance code robustness and maintainability, ensuring a seamless and high-quality user experience.

Feb. 2019 –  
Mar. 2021

**Clichead | Front-end developer** - With a focus on developing and managing dynamic websites using WordPress and WooCommerce. Additionally, I handled email management tasks using AWS services, ensuring efficient and reliable communication systems. My responsibilities included collaborating with design teams to create seamless user experiences, maintaining the technical aspects of web infrastructure, and optimizing website performance for better user engagement.

Oct. 2018 –  
Feb 2019

**BlackPoint Software | Full-stack developer. (PHP, JavaScript, HTML/CSS)** - Focusing on both front-end and back-end development. My responsibilities included creating and maintaining web applications using PHP for server-side logic and JavaScript for client-side interactivity. I also utilized HTML and CSS to design and style web pages, ensuring responsive and user-friendly interfaces.

## Recent Projects

**Capnote:** Web app related to finance, built with React (Typescript) and Tailwind. I used Redux Toolkit for global state management and Axios configuration for HTTP Requests, built reusable components based on designs (Figma), created and assigned tasks in Jira.

**Chivy:** Mobile app related to dating, using React Native, Redux Saga for global state management, and Axios configuration for HTTP Requests, and also TypeScript. Connecting to services like firebase and using Socket.io to handle real-time chats.

**AJNA:** Web app related to cryptocurrency and blockchain. I was in charge of building the UI for the Grants functionality inside a Dapp which was made to allow for the AJNA ecosystem to have a coordinated growth in a scalable and decentralized way. React, React Query, React Hook Forms, Web3, Typescript, Vercel, Tailwind.

## Languages

Spanish **Native proficiency.**

English **C2 Level.** EF Certificate: <https://www.efset.org/cert/p64tnn>

## Educational Qualifications

2010–2015 **Bachelor's Degree in Secondary Education.**

U.E. Nuestra Señora de la Asunción - Nueva Esparta, Venezuela.

2016–2018 **Computer Science** (6 semesters).

Universidad de Oriente. Núcleo Nueva Esparta, Venezuela.
